Rate Formula Template Utilizing FERC Form 1 Data

MidAmerican Central California Transco. LLC

For the 12 months ended 12/31/2021

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#) References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

## Note L<u>etter</u>

В

The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory asse or liabilities related to FASB 158 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utili chose to utilize amortization of tax credits against taxable income as discussed in Note F. Account 281 is not allocate

- Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmissio С
  - Prepayments are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57 in the Form
- D Line 35 excludes all Regulatory Commission Expenses itemized at 351.1

Identified in Form 1 as being only transmission relater

- all advertising included in Account 930.1 (except safety, education or out-reach related advertising) ar all EEI and EPRI due and expenses
- Line 42 reflects all Regulatory Commission Expenses directly related to transmission service, RTO fillings, or transmission siting itemized at 35
- Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current ye Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Templa since they are recovered elsewhere. Excludes other taxes associated with facilities leased to others that are charged to the lesse
- The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and n "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility th elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduc rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8

nultiplied by (1/1-1)			
Inputs Required:	FIT =	0.21	
	SIT=	0.09	(State Income Tax Rate or Composite SIT from Attachment 2
	p =	4.0	(percent of federal income tax deductible for state purposes
			(norcontage of ownership that is not for profit)

For each Rate Year (including both Annual Projections and True-Up Adjustments) the statutory income tax rates utilized in the Formula Rate shall reflect the weighted average rat actually in effect during the Rate Year. For example, if the statutory tax rate is 10% from January 1 through June 30, and 5% from July 1 through December 31, such rates would be weighted 181/365 and 184/365, respectively, for a non-leap yea

- Prior to issuing any debt, the cost of debt on Attachment 5, Line 25 for the relevant year will be used. If Construction Financing (where an amount is borrowed but the funds are drawn down over the construction period) is obtained, the cost of debt is determined using the internal rafe of return methodology shown on Attachment 5 until a project is placed in service, subject to true-up pursuant to Attachment 8, and the cost of debt is determined using the methodology in Attachment 2 after a project is placed in service. Attachment 5 contains a hypothetical example of the internal rate of return methodology, the methodology will be applied to actual amounts for use in Appendix III. If non-construction financing is obtained, the cost of debt is determined using the methodology in Attachment 2 and Attachment 5 is not used.
- Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and genera step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation stepfacilities are those facilities at a generator substation on which there is no through-flow when the generator is shut dow
- ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC under FPA Section 205 or 206.
  - The return on incentive projects will be calculated on Attachments 3 and 4 and input on line 66. The capital structure shown on lines 80-83 will be 52% equity and 48% debt until project is placed into service. After the project is placed in service, the capital structure on lines 80-83 will reflect the actual capital structure.
  - The ROE of 10.3% reflects the 9.8% negotiated Base ROE, plus 50 basis points for MCCT's commitment to become a member of the CAISO regional transmission organization ("RTO") as authoriz by the Commission in MidAmerican Central California Transco, 147 FERC ¶ 61,179 at P 45 (2012).
- Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Company must submit a Section 205 filling to recover the cost of abandoned plant. Any such filling to recover the cost of an abandoned plant item shall be made no later than 730 days after the date that Company formally declares such plant item abandoned.
- The regulatory assets will accrue carrying costs equal to the weighted cost of capital on line 83 until the formula rate is effective as the resulting charges are assessed custome
- М Any plant leased to others will be removed from Plant In Service and booked to Leased Plant, Account 104. Expenses charged to the lessee will be booked to Account No. 4 and the accumulated depreciation associated with the leased plant shall not be included above on lines 9-
- Ν Incentive returns are excluded from lines 5-65, but rather the incremental incentive return is calculated in Col J on Attachment 4 and included on line
- O P Excludes TRBAA expenses
- Excludes costs associated with Asset Retirement Obligations (ARO) absent a subsequent filing under FPA Section 2C
- Includes the construction loan true-up from Attachment 8 in the year after the construction loan is paid off or a project goes into service.

# Attachment 1 - Revenue Credit Workpaper MidAmerican Central California Transco, LLC

Account 454 - Rent from Electric Property	Notes 1 & 3	
1 Rent from FERC Form No. 1	Note 3, line 11	-
Account 456 and 456.1	Notes 1 & 3	
2 Other Electric Revenues (Note 2)		-
3 Professional Services		-
4 Revenues from Directly Assigned Transmission Facility (	Charges (Note 2)	-
5 Rent or Attachment Fees associated with Transmission I	Facilities	-
6 Revenue Credits from Attachment 10 and not in lines 1 to	0 5	-
7 Total Revenue Credits	Sum lines 2-6 + line 1	-

- Note 1 All revenues booked to Account 454 that are derived from cost items classified as transmission-related will be included as a revenue credit. All revenues booked to Account 456 that are derived from cost items classified as transmission-related, and are not derived from rates under this transmission formula rate will be included as a revenue credit. Work papers will be included to properly classify revenues booked to these accounts to the transmission function. A breakdown of all Account 454 revenues by subaccount will be provided below, and will be used to derive the proper calculation of revenue credits. All revenue credits that are included in the TRBAA are excluded here.
- Note 2 If the facilities associated with the revenues are not included in the formula, the revenue is shown below, but not included in the total above and explained in the Attachment 3. This includes plant leased to others and the associated expenses outlined in Note M of Appendix III.
- Note 3 All Account 454 and 456 Revenues must be itemized below

## Attachment 5 Financing Costs for Long Term Debt using the Internal Rate of Return Methodology MidAmerican Central California Transco, LLC

To be utilized until an entire project is placed in service

10 oe utuzed until an entre project is placed in service
Consistent with GAAP, the Origination Fees and Commitments Fees will be amortized using the standard Internal Rate of Return formula below.
Each year, the amounts withdrawn, the interest paid in the year, Origination Fees, Commitments Fees, and total Ioan amount will be updated on this attachment.
Assumes financing will be a 4 year Ioan with Origination Fees of \$1.7 million and a Commitments Fee of .35% on
\$250,000,000. However, the actual terms, conditions, and duration of the Ioan may vary depending on such factors as market conditions and the scheduling of the project.

- 1 The IRR is the input to Debt Cost shown on Appendix III, line 80 during the construction period, after obtaining project financing, in accordance with Note G of Appendix III.
  2. The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation is shown on line 6.

  N is the total number of quarters the loan would be outstanding

t is each quarter

t is each quarter

Cit is the cash flow (Table 5, Col. I in each quarter)

Alternatively the equation can be written as 0 = C0 + C1/(1+IRR) + C2/(1+IRR) 2 + C3/(1+IRR)3 + ... + Cn/(1+IRR)n and solved for IRR

The Excel ™ formula on line 2 is : (round(XIRR)first quarter of loan Col I of Table 5.last quarter of loan Col I of Table 5.la The 8% in the above formula is a seed number to ensure the formula produces a positive number.

3. Line 1 reflects the loan amount, the maximum amount that can be drawn on
4. Lines 10 through 21x include the fees associated with the loan. They are estimated based on current bank condition and are updated with the actual fees once the actual fees are known.
5. Line 23 is the LIBOR 1-month rate published on the Wall Street Journal's public site for the first business day of August during the year immediately prior to the Rate Year for the forecasted rates.

5. Life 28 in the Libror - inflution tale published on the Wall Street Journa's pound care 23 and labor to support 3, 2015. The rates for the Rate Year will be trued up each year following be based on the Bloomberg Forward Curve 23 available on August 3, 2015. The rate for the Rate Year will be trued up each year for equal the average LIBCR 1-month rate published on the first business day of each month during the Rate Year. The published rates for August and the true-up are available at <a href="https://ionline.wsi.com/mdc/public/pager2">https://ionline.wsi.com/mdc/public/pager2</a> 3202-libor. html

(An equivalent website will be established if this website is no longer available at any time in the future).

7. Table 5, Col. C reflect the capital expenditures in each quarter

7. Table 5, Col. D reflect the amount of the boan that is drawn down in the quarter

8. Table 5, Col. G is the total fees in line 10-16 and is input in the first quarter that a portion of the loan in drawn

9. Table 5, Col. H is calculated as follows:

(A x B) +C

- A. Loan amount in line 1 less the amount drawn down in the prior quarter

- B. Annual dollar amount fees on lines 10 through 21a divided by 4 (divided by to convert annual amounts to quarterly amounts)

  C. Percentage dollar amounts divided by 1000 (applied in the quarters the payments are made)

  10. The inputs shall be estimated based on the current market conditions and is subject to true up for all inputs, e.g., fees, interest rates, spread, and Table 4 once the
- amounts are known. Until know, the spread shall be 2.5%
- anisonance in Norman Commit Norman (Norman Norman (Norman Norman) (Norman Norman) (Norman Norman) (Norman) (Nor

### Notes

- 1. the Revenue Requirement Billed is input, the source are the invoices from CAISO. The amounts do not include any true-ups, prior period adjustments, or TRBAA amounts
- 2. the Actual Revenue Requirement is input from Attachment 4, line 8, Col. J. The amounts do not include any true-ups, prior period adjustments, or TRBAA amounts
- Then Monthly Interest Rate shall be equal to the interest rate set forth in Section 6 of the Protocols.
   The True-Up Adjustment is applied to each project prorata based its contribution to the Revenue Requirement shown in Appendix III, line 1.

MidAmerican Central California Transco, LLC

Interest rate calculated on Attachment 8 uses estimates that would not be trued up under Attachment 5, absent this attachment. Accordingly, this attachment calculates the difference in interest rates actually charged and the final interest rate calculation after the loan in Attachment 8 is paid off. This attachment calculates a one time true up that incorporated into the next annual true-up pursuant to Appendix III, Note Q.

30		Transmission facility Contributions in Aid of Construction	Note 1	

Note 1: In the event a Contribution in Aid of Construction (CIAC) is made for a transmission facility, the transmission depreciation rates above will be weighted based on the relative amount of underlying plant booked to the accounts shown in lines 1-11 above, and the resultant weighted average depreciation rate will be used to determine the life over which to amortize the CIAC. The life of each facility subject to a CIAC will be estimated in this manner at the time the plant is placed into service, and will not change over the life of the CIAC without FERC approval. The combined amortization expense for all CIACs shall be the sum of each individual CIAC balance amortized over the life of each individual CIAC established in this manner.

These depreciation rates will not change absent the appropriate filing at FERC.

### Notes:

<sup>(1)</sup> MCCT must list ALL unfunded reserves on its books by subaccount, specifically including (but not limited to) all subaccounts for FERC Account Nos. 228.1 through 228.4. "Unfunded reserve" is defined as an accrued balance (1) created and increased by debiting an expense which is included in this formula rate (2) in advance of an anticipated expenditure related to that expense (3) that is not deposited in a restricted account (e.g., set aside in an escrow account) with the earnings thereon retained within that account. Where a given reserve is only partially funded through accruals collected from customers, only the balance funded by customer collections shall serve as a rate base credit. The source of monthly balance data is company records.
